## **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Claims 11, 13, 18, 21, 23, and 25 are patentable over the prior art patents and printed publications because of the specific configuration of the laser beam scanner used in a photographic printer, the laser beam scanner including first, second and third laser light sources emitting a red, green and blue laser beams, respectively, a conveyor for linearly conveying a photographic paper to a scanning plane of the laser beam scanner at a constant speed, an optical scanning system, and an optical path adjusting system for adjusting optical paths of the optical scanning system, which includes a position sensor disposed on a plane optically conjugated with the scanning plane, first, second and third adjuster for adjusting the respective optical path of the first, second and third laser beams, whereby all the positions of the laser beams can be adjusted to overlap at a certain point on the scanning plane. The combined limitations are not taught by the art of record alone or in combination.

Claims 12, 14-17 and 19 are allowed because they are directly or indirectly dependent from claim 11 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
